Professional Summary

Software Developer with experience in corporate system maintenance, bug fixing, and developing solutions using Delphi, PHP, JavaScript, and PL/SQL. Skilled in requirements analysis, SQL query optimization, bug validation, and building web applications with Python (Flask). Analytical profile with a strong ability to learn new technologies quickly, operating effectively across both software development and Quality Assurance (QA).

Technical Skills

- Programming Languages: JavaScript, TypeScript, Python, C, PHP, Delphi
- Databases & Queries: SQL Server, PL/SQL, SQLite, Firebase
- Frameworks & Web: Flask, HTML5, CSS3, DOM Manipulation
- Methodologies & Tools: Git, GitHub, Bug Fixing, Code Refactoring, Scrum, Kanban, Black-box/Functional Testing, Triggers & Procedures
- Advanced Technical English (Focus on documentation and coding)

Professional Experience

Solus Saúde

Technical Support Analyst / Maintenance Developer | 11/2025 – 07/2026

Analyze systems, identify failures, and implement hotfixes in legacy and modern applications using Delphi, PHP, JavaScript, and PL/SQL.

Develop database-level solutions, including creating triggers, functions, and refactoring queries to improve system performance.

Support Quality Assurance (QA) through validation, functional testing, and approval of bug fixes prior to production deployment.

Freelance & Personal Projects

Development of responsive web systems, institutional landing pages, and automation tools using Python (Flask) and JavaScript.

- Maciel e Morais Advocacia: Designed and developed a professional landing page for a law firm.
- Bookcase: Built a web-based management system using Flask.
- Yard Manager: Developed a tracking/management system integrated with Firebase.
-
